

FOR IMMEDIATE RELEASE

Quess GTS & Corent Tech Join Forces to Accelerate Digital Transformation

Harnessing the Power of Cloud Computing and SaaS to Dramatically Reduce Costs of Digital Transformation and Cloud Operations

MORRIS PLAINS, N.J., and ALISO VIEJO, Calif., Aug. 17, 2023 -- Quess GTS, a premier provider of digital transformation services, including managed services, cloud migration, hosting and infrastructure support and Corent Technology, Inc., an industry pioneer in cloud migration, optimization, and SaaS transformation technology, today unveiled their strategic partnership. This alliance is set to leverage the unique strengths of both companies, delivering sophisticated and integrated solutions to global clientele, while unlocking the power of cloud computing and Software as a Service (SaaS).

In an era where digital transformation is a business imperative, Quess GTS and Corent Technology are uniting their efforts to provide comprehensive solutions. These include cloud implementation, business optimization, production support services, and cloud optimization (including Finops) technologies. The partnership further underscores Quess GTS's commitment to delivering optimized and automated solutions through their Innovation Centers of Excellence.

"Our partnership with Corent Technology elevates our capabilities to better support our clients' digital transformation initiatives," said Daniele Pedrazzoli, COO of Quess GTS. "The synergy with Corent's expertise in cloud migration and SaaS technologies enriches our comprehensive digital transformation services, creating powerful and cost-effective solutions for our clients. There are tremendous opportunities for firms to realize substantial savings from the analytics and optimizations initiatives generated directly from their cloud environments."

"The combination of Corent's cloud lifecycle product line and Quess GTS's services is a powerful solution for enterprise customers who need to transform their businesses to gain a competitive advantage.," said Corent Tech CEO Feyzi Fatehi.

Clients spanning diverse industries such as insurance, banking, transportation, and more stand to reap substantial benefits from this partnership. By leveraging Corent's ComPaaS platform, compatible with AWS, Microsoft Azure, Google Cloud Platform (GCP), Oracle, and private

clouds, businesses will gain a competitive advantage. Moreover, significant cloud cost savings will positively impact each client's bottom line.

Quess GTS, leading the industry in Enterprise Modernization, Managed Services, Cyber Security, Cloud Migration and Optimization, Automation and API Integration for enterprise infrastructure, further strengthens its position through this alliance. Corent Technology's ComPaaS platform complements and enhances Quess GTS's service offerings.

About Quess GTS
