

YANI AI CHATBOT

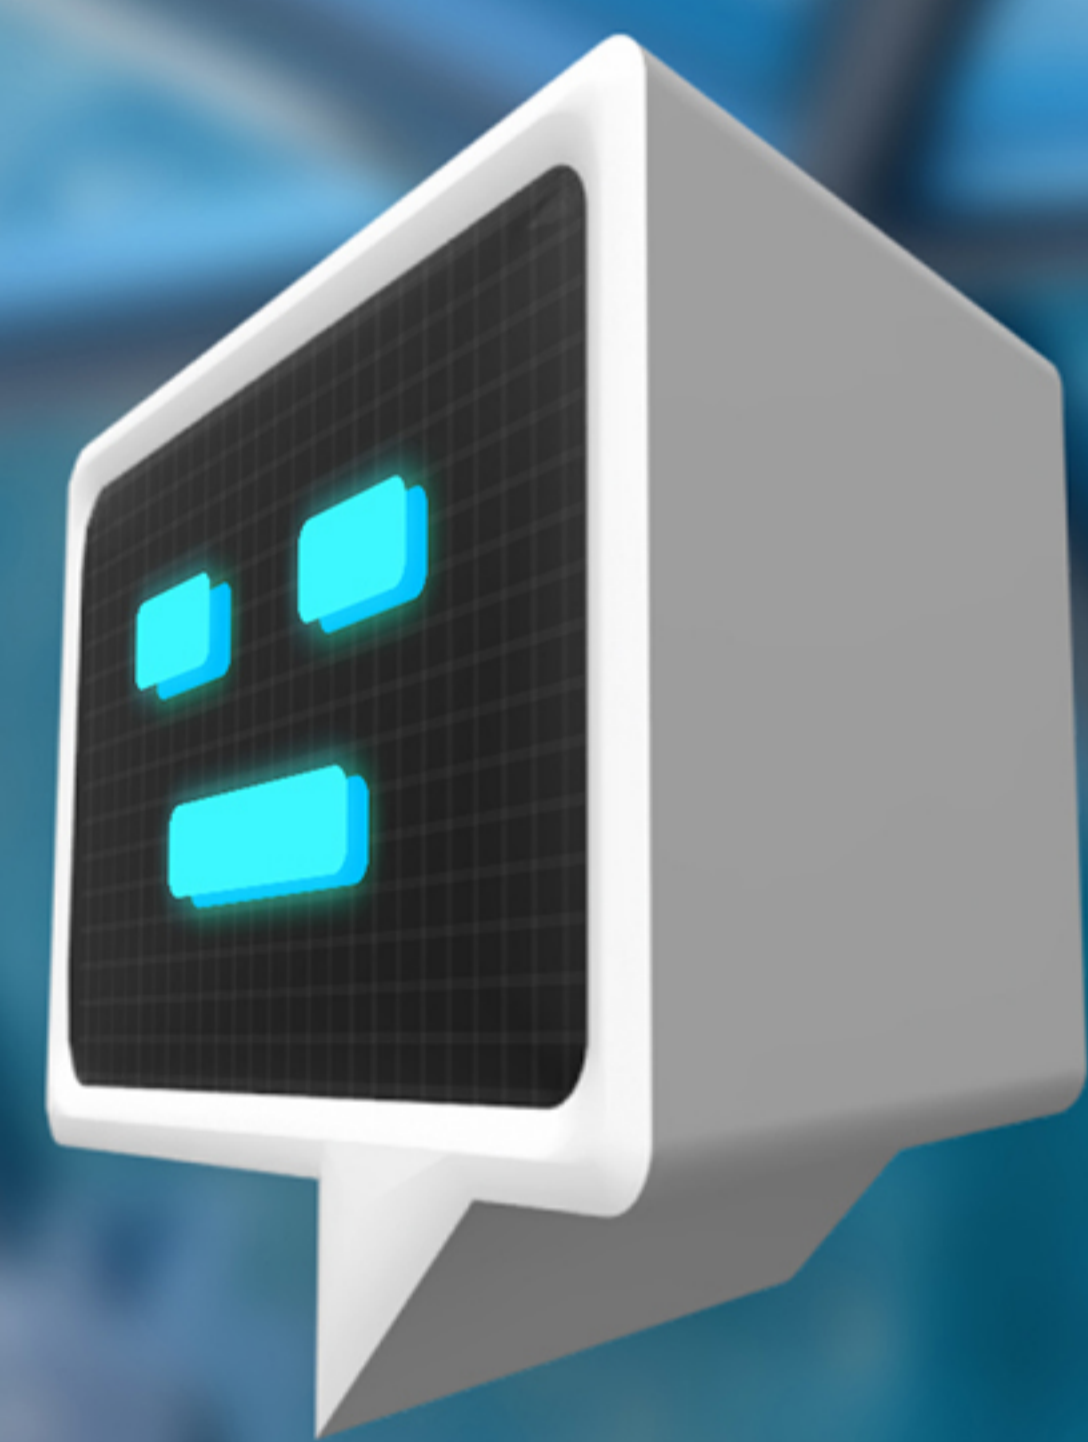

YOUR ULTIMATE CLOUD COMPANION

Can you provide the cost difference for servers with over 90% utilization, comparing those recommended with a Right Size Match against those with an As Is Match?

Cost Difference for High Utilization Servers

For servers with over 90% utilization, the cost difference between those recommended with a Right Size Match and those with an As Is Match is \$246.74.

Specifically, the server with IP address 192.168.2.241, running on Azure, had a Right Size Match flavor of Standard_B16als_v2 with a total monthly cost of \$566.70, whereas the As Is Match flavor, Standard_B8als_v2, had a total monthly cost of \$319.96.

Drowning in Cloud complexity?

Yani is your AI ally. **Summarize data, navigate seamlessly, and get instant answers**—all while strategically orchestrating your Cloud journey.

BENEFITS

01

STREAMLINED DECISION-MAKING

Instantly access summarized, relevant information to make well-informed decisions with minimal effort, reducing the steep learning curve.

02

EFFORTLESS NAVIGATION

Easily navigate a variety of applications with contextual guidance and direct links to relevant sections, ensuring a smooth user experience.

03

TIME-SAVING EFFICIENCY

Save valuable time with quick, accurate responses that allow you to focus on strategic tasks, while Yani handles information retrieval and analysis.

04

TAILORED INSIGHTS

Receive tailored recommendations for your cloud service needs. Yani remembers past interactions and offers human-like conversations using advanced NLP and NLU.

KEY FEATURES

INTELLIGENT NAVIGATION

Guides users through diverse scenarios, providing direct links to the exact features or data points needed for faster, easier navigation.

INSTANT DATA SUMMARIZATION AND RETRIEVAL

Summarizes large datasets and quickly fetches relevant information, delivering actionable insights tailored to your needs.

CONTINUOUS LEARNING

Over time, Yani fine-tunes its answers, using past thread interactions to keep conversations flowing naturally and efficiently.
