

Corent's SaaSOps™ Platform enabled C-Facts to transform their cloud governance platform into a fully SaaS-ready solution in just 48 hours, accelerating tenant self-service and operational efficiency without code changes.

Case Study

C-Facts: Revolutionizing Cloud Governance in Record Time

In a race against time C-Facts, a Europe-based managed services provider, faced a formidable challenge: transforming their Kubernetes-based, multi-tenant application on Microsoft Azure into a fully SaaS-enabled platform. Their goal was ambitious yet critical—to empower tenants with self-provisioning capabilities and integrate secure online payments, all without disrupting their existing production environment. Enter Corent Technology and its innovative SaaSOps platform.

Region: Europe

Industry: Cloud services & IT management

Corent's SaaSOps platform enabled us to rapidly take our cloud insight and sustainability governance application to market as SaaS...all in a matter of days. — **Martijn van Zoeren, CEO, C-Facts**

The Challenge

While C-Facts' application already delivered comprehensive digital insights into cloud footprints for enterprises and CSPs, it lacked key SaaS features essential for modern cloud solutions, such as:

Tenant self-service capabilities.

Advanced subscription management for scalable service delivery.

C-Facts needed a powerful, yet minimally invasive, solution to transform their system without altering the existing codebase or risking downtime.

The Solution

Corent Technology stepped in with a transformative approach. Using its SaaSOps platform, they rapidly integrated advanced SaaS capabilities into the C-Facts application, delivering:

- ◆ **Self-Service Provisioning:** Enabling tenants to provision accounts independently
- ◆ **Secure Payment Integration:** Leveraging Stripe's latest features for secure transactions
- ◆ **Scalable Subscription Models:** Allowing flexible subscription options, including add-ons, discounts, and refunds
- ◆ **Seamless API Adaptability:** Utilizing C-Facts' APIs to maintain operational harmony without code changes.

The Results

In just 48 hours, C-Facts unveiled their enhanced application, now equipped with:

- ◆ Advanced SaaS capabilities for tenant lifecycle management.
- ◆ Integration-ready features for Azure Marketplace and usage-based billing.
- ◆ A scalable foundation for future expansions.

Discover how Corent Technology's SaaSOps platform can accelerate your SaaS transformation with minimal disruption.
