

ComPaaS Case studies

Climate Change Solutions Company

Cloud Resource Optimization

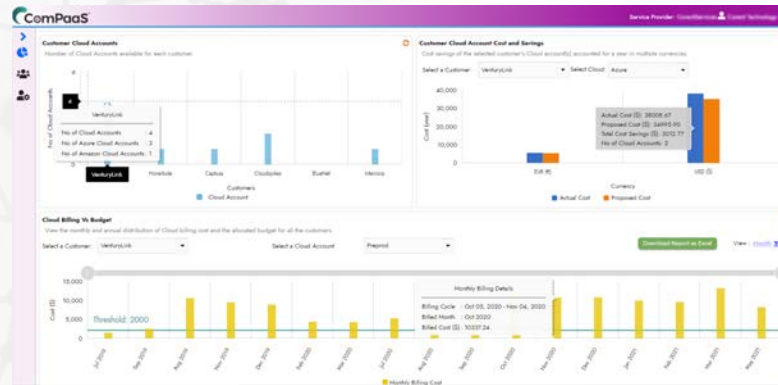

Challenges

- Offering multiple subscriptions plans to Customers
- Managing multiple Cloud accounts across regions
- Rightsizing of VM 's based on the utilization.

Save Cloud Cost
in your Cloud Accounts, available in different
regions.

Business Benefits

- Multiple subscriptions plans with different features set can be defined
- Single dashboard to monitor your Cloud resources across regions with integrated advisories and actions
- Analyze and automate VM actions with ComPaaS trend analysis

Leading Brand for eye wear and helmets Company

Cloud Resource Optimization

Challenges

- On boarding customers and maintain their Cloud subscriptions
- Optimizing Cloud cost and footprint reduction.
- Deploying resources in different regions with security and compliance.

Optimize Your Cloud Landscape using AI-driven actions

Business Benefits

- Quickly manage and provision customers and their access.
- Forecast your Cloud cost based on the usage of Cloud resources.
- Analyze and automate VM actions with ComPaaS trend analysis

Financial Services Regulatory Consultancy

Cloud Resource Optimization

Challenges

- Maintaining the entire Cloud infrastructure across different regions
- Reducing Cloud cost and footprint
- Managing the Cloud resources and their usage.

Control your Cloud cost by implementing the actions suggested for resources.

Business Benefits

- View your entire Cloud infrastructure from a single pane .
- Smart advisories enables to cut down the Cloud cost and footprint.
- Facility to define and execute actions on your resources at the right time

View the list of VM(s) with their details, along with the CPU utilization statistics.

Region	Resource Group Name	VM Name	Flavor Name	CPU Utilization				Change Action Required	Action Status	Analyze Performance
				Maximum	Average	Standard Deviation	95 Percentile

Advisory List

Drift (out of resource(s) based on the advisories.

Region	Resource Type	Advisories	Current Billing Cycle Savings	Monthly Savings
East US	Virtual Machine	You have used more than 90% of the quota allocated for your cloud account. Increase the quota based on your usage.	-	-
East US	Virtual Machine	1 VM(s) are in stopped state for more than 45 Days. Delete the unused VM(s) to save operational charges of the stopped VM(s).	\$ 1.33	\$ 1.43
East US	Virtual Machine	0 VM(s) are in running state for more than 30 Days. Identify the VM(s) that are not required and stop/delete to save Cloud cost.	-	-
East US	Virtual Machine	0 VM(s) are using General flavor (ideal for testing and development), therefore they are not recommended for production.	-	-
East US	Virtual Machine	0 VM(s) are running for more than 90 Days with PayAsYouGo pricing model. Change the VM(s) to 3 Year Reserved pricing model to save Cloud cost.	\$ 78.13	\$ 81.87
East US	Virtual Machine	0 VM(s) are using General flavor (ideal for testing and development), therefore they are not recommended for production.	-	-
East US	Virtual Machine	0 VM(s) are running in Standard_A1 flavor can be changed to Basic_A1 flavor to reduce cost.	\$ 41.76	\$ 44.74
East US	Storage Account	5 unused VMD File(s) are available in the storage account. By removing these VMD File(s) cost can be reduced.	\$ 25.30	\$ 27.11
East US	Storage Account	9 Storage accounts are not lock-enabled to restrict deletion. Enable lock to prevent any data loss.	-	-
East US	Disk	1 unused Data Disk(s) are available in the cloud account. By removing these data disk(s) quota can be increased and cost can be reduced.	\$ 5.70	\$ 6.11

Managed Service Providers Company

Cloud Resource Optimization

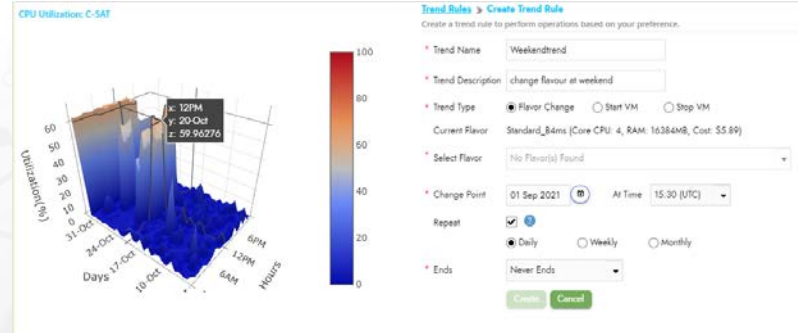

Challenges

- Cutting down the Cloud cost effectively.
- Notification about the Cloud resources.
- Downloading reports about Cloud resources for the ease of view

View the historical performance trends in a simple 3D graph to gain relevant insights about your usage patterns and customize your trend rules.

Business Benefits

- Cut down your Cloud cost continuously using our trend-based optimization
- E-mail notification about the execution of automatic trend rules.
- Ability to download the advisories and charts in PDF and XLS.

e-Mobility Company

Cloud Resource Optimization and Modernization

Challenges

- Managing multiple customers.
- Visualizing your applications with their interconnections.
- Managing the applications on Cloud.

Visualize Application Landscape on Cloud and manage effectively.

Business Benefits

- Helps to view multiple customer environments through a single dashboard.
- Generate and visualize the landscape for all your applications and their multiple copies on Cloud.
- Manage Applications, Not just VMs.

Managed IT Service Provider

Cloud Resource Optimization

Challenges

- Effective monitoring of Cloud resources.
- Identifying the cost consuming resources.
- Getting the latest data from Cloud for the resources.

Save Cloud Cost
in your Cloud Accounts, available in different
regions.

Business Benefits

- Unified Dashboard for effective Cloud monitoring.
- Identifies the most cost consuming resources and provides options to optimize them.
- Automatic sync option to get latest data from Cloud.

Multi-Cloud Managed IT Services

Cloud Resource Optimization

Challenges

- Rebranding the application
- Tracking the changes performed on the Cloud resources.
- Tracing the hierarchy and interconnections of Cloud resources.

Visualization map with touch-and-feel effect to know interconnections of Cloud resources.

Business Benefits

- Facility to rebrand the product with customized information
- Ability to provide security and governance as you manage your Cloud resources.
- Visually move between resources, trace the hierarchy and interconnections.
