

## SurPaaS® MaaS™ – PaaS Shift™

**SurPaaS® MaaS™ helps you in migrating your app workloads to the PaaS services in Cloud.**

**PaaS Shift™ helps you to integrate PaaS services with your app using easy-to-follow steps within a short period**

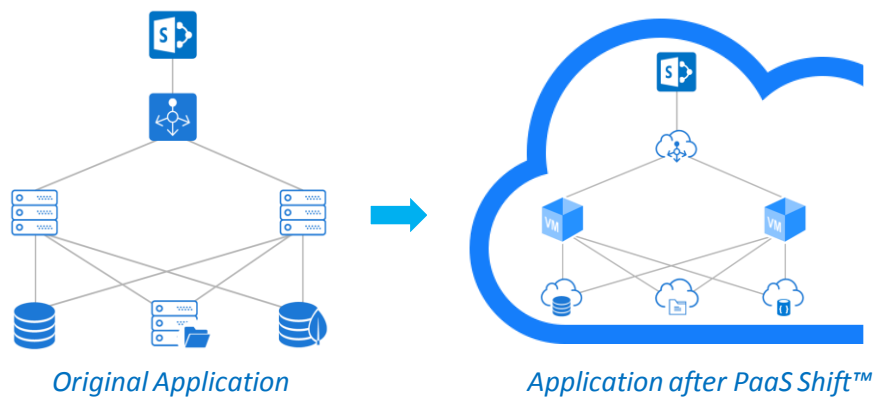

### Key Benefits in Shifting to PaaS Services:

- Region-wise distribution.
- Zero downtime.
- Reduction in development time and in resources required.
- Auto backup and recovery.
- Auto-scaling.
- Efficient management of application lifecycle.

PaaS services in Cloud offer numerous benefits to its users, notably high scalability with extremely high reliability. Applications that are directly using PaaS services will be able to inherit these key features which makes your application much more robust. It also helps you to cut down the effort and cost towards operations and maintenance.

With PaaS Shift™, Corent is the first company to migrate your application workloads effortlessly to PaaS services in Cloud. As applications are assessed and optimized by SurPaaS® MaaS™, your application workloads are mapped directly to the PaaS services and migrated to Cloud. Rest of your workloads will be moved to Cloud VMs and integrated with these PaaS services.

### Application Topology from a Sample PaaS Shift™:

With just few clicks, your application will be integrated with the PaaS services using PaaS Shift™ and will be ready for use when the Cloud migration is complete.

Identifying the possibility of utilizing PaaS service in your application and comparing different PaaS services from different Cloud providers against the features they offer and their cost are essential before migrating your application workloads. SurPaaS® MaaS™ takes care of these critical challenges for you.

### List of PaaS Services:

Web Servers; RDBMS Servers; Load Balancers; Cache Servers; Big Data; NoSQL Database; Directory Service; File Servers; Queue Servers.
